

Hoyang Tsai

Senior Software Engineer

Web Applications, Graphics & AI-Assisted Engineering

✉ hire@hoyang.dev |  linkedin.com/in/hoyangtsai |  github.com/hoyangtsai

SUMMARY

Senior Software Engineer with 14+ years of experience building web applications and complex interactive products. Experience spans React/TypeScript frontend architecture, Node.js and REST API development, SQL, AWS, performance optimization, CI/CD, and production troubleshooting. Deep expertise in graphics and animation tooling, combined with a practical AI-assisted engineering approach using agentic workflows, tool calling, structured outputs, evaluation, and human-in-the-loop verification.

EXPERIENCE

Senior Front-end Engineer, LottieFiles

2025/12 - 2026/08

Remote

- Owned Creator's canvas text engine, shipping AE-style paragraph text and resolving font fallback, alignment, wrapping, and playback issues
- Expanded Creator's Motion Tokens theming system to support gradient and transform/style tokens in a 166-file core change
- Diagnosed and fixed a production gradient color picker crash associated with 293 Bugsnag events affecting 16 users
- Replaced per-frame scenegraph traversal with constant-time lookup, resolving a production performance regression that exceeded 200% of the frame budget in large documents
- Built a reusable AI-assisted engineering workflow spanning root-cause diagnosis, fix planning, implementation, code review, and verification across Creator's multi-repo stack

Senior Software Engineer, Phase

2023/11 - 2025/07

Taipei, Taiwan (Hybrid)

- Led frontend delivery of core Phase editor features including SVG import, co-editing presence, animation presets, and text-on-canvas editing
- Built a Figma plugin that imported designs into Phase with approximately 90% compatibility across supported Figma elements and converted component variants into interactions
- Improved application stability, reducing recurring bug-bash meetings from weekly to monthly

Staff Software Engineer, ShopBack

2022/05 - 2023/01

Taipei, Taiwan

- Led frontend development of the ShopBack Chrome extension, with 800K+ installs across 9 regional markets
- Reduced Chrome extension startup time by 91%, from 2.3 seconds to 0.2 seconds, and added end-to-end smoke test automation to strengthen QA coverage

Senior Front-end Engineer, Tencent

2016/01 - 2021/03

Shenzhen, China

- Built FinTech web applications and WeChat mini-programs for millions of users, including gold investment, currency exchange, and asset management products
- Developed cross-platform UI components and applications using React, Vue, and WeChat Mini Programs for Android, iOS, and desktop environments

Front-end Engineer, Foxconn

2013/07 - 2015/08

Kaohsiung, Taiwan

- Worked across frontend interfaces and backend REST APIs in the full-stack development of web applications

Software Engineer, Hismax

2011/10 - 2013/04

Kaohsiung, Taiwan

- Developed and customized Java-based PTC systems for manufacturing clients

SKILLS

Full-Stack & Graphics React, TypeScript, JavaScript, Next.js, Vue, Node.js, REST APIs, SQL, AWS, Java, Canvas/SVG/WebGL, Lottie, Vite, Playwright, CI/CD

AI-Assisted Engineering Prompt & Context Engineering, Agentic Workflows, Tool Calling/MCP, Structured Outputs, Evaluation & Verification, Human-in-the-Loop

EDUCATION

- Bachelor of Information Technology, Griffith University 2007/03 - 2010/06
